Architectural, City View, Concrete, Eclectic Quirky, Empty, Modern Contemporary, Raw Industrial

Notes

Exterior of graphic concrete building available for shoots. Entry is through an open-air court. There is an indoor elevator lobby enclosed in curved floor-to-ceiling glass, or residents can ascend the sculptural stairway that dramatically opens to the central atrium.

Towering open-air walkways are laced with a nearly transparent woven metal mesh that fully encloses the walkways. Both more beautiful and safer than traditional railings, this revolutionary design provides an ever-changing environment that reflects the light and seasons.

The open walkways are designed to connect to the landscape while protecting from the elements. Coverings overhead and radiant heating combat ice and snow, while a sense of openness floods the spaces with light and provides a multitude of sightlines into the courtyards and neighborhood beyond.

There is a common space with bathroom that is available.

Restrictions:

No painting or nailing into walls.

No shoots past 6pm.
