 CATEGORIES

Barns, Farm, House

Notes

A beautiful antique farmhouse settled on a tree-lined driveway of flowering tulip trees. Built in 1865, the house features many traditional, original features (original brick fireplace and the hand-dug well which still provides water to the house) as well as two detached and finished external barns.

The property itself sits in 6 acres adjacent to a state park, and features two waterfalls, overflowing gardens in the summer, deep colored foliage in the fall and bucolic charm in the snow. It also has modern touches like a full functioning pottery studio in the garage and a home gym.

**Restrictions:**

No painting or nailing into walls.
