## Notes

Converted from an early 20th-century noodle factory (later used as artists' lofts), the building is a fortress of thick concrete floors and striking columns. The loft has an oversized, voluminous space that stays true to the character of the building and the neighborhood's manufacturing heritage. With over 12' ceilings, exposed beams and massive windows, the unit embodies the heart of bustling Williamsburg. The unit features an array of modern and vintage pieces all with a rock n roll meets goth vibe.
