## Notes

Set in a historic Chelsea factory building, this designer Manhattan loft spans 6,000 square feet, with broad windows and an auxiliary studio apartment incorporated into the generous floor plan. Every room is a careful, imaginative curation with distinct character. Each room is a work of art, from geometric grids in the ceiling, to mosaic tile in the bathroom, and wall-mounted fabric pieces in the bedrooms.

The library is a central feature, with both built-in and floating bookcases. An open kitchen adjoins with a lounging area room, both bathed in natural light.
