## Notes

Built in 1899, this magnificently restored townhouse is a Brooklyn architectural gem. With exceptional original details meticulously restored, this home has been decorated by the owners and interior designers. Classic New York 19th century meets 21st century Brooklyn cool. The house is ideal for filming with a parlor floor that measures 45 feet deep. On the upper duplex, rooms are large and spacious. The parlor floor has a deck by the dining/kitchen area.

Note: As of February 2023, the grey sofas in living room have been replaced with citron green sofas.
