Notes

Beautiful mid-century modern home—a Bauhaus construction built in 1937—which is set in a wooded area with river views.

The spacious living/dining area on the main level has large casement windows, open plan kitchen, working fireplace, and opens up onto a deck with a built in hot tub. There is also a stunning vaulted stairwell. On the top floor there are 4 bedrooms, including a large master bedroom with a private balcony (also with river views). The lower levels includes a large family room, 5th bedroom and sauna/jacuzzi area.

Property also includes pool table, lower deck, spacious lawn and garden. The house is located at the end of a dead end block and is quiet and secluded.
